

IN THE CLAIMS

Presented below are the amended claims in a clean, un-marked format:

Sub B1
A1
1. (Once Amended) A touchpad device comprising:
2 a detection array having a detection surface, wherein the detection surface
3 is configured to receive a fingerprint image;
4 a processing device to receive image data from the detection array, the
5 processing device further to configure the touchpad device to operate as a
6 pointer control device or a fingerprint recognition device based upon parameters
7 associated with the image data.

16. (Once Amended) The multi-function device of claim 15, wherein
2 the pointer control device controls movement of a cursor on a display screen.
